Mobile App and Reputation Management

More Apps. More possibilities. More security.

APPVISORY is the SaaS solution for large companies and corporations. Europe's leading mobile application management software is the effective tool for companies to secure their business used smartphones and tablets. The SaaS solution is developed and hosted in Germany and offers German and English language support.

It is able to provide existing security and compliance policies to the mobile devices. APPVISORY checks automatically – using its NUCLEUS engine – all installed apps and provides risk assessment based on the individual requirements of the company. The app catalog with a comprehensive portfolio of tested apps is available for the users with an intuitive user experience.
