

A D E Y A

Swiss, Simple Secure collaboration

MILITARY AND  
DEFENSE SOLUTION

## Adeya Guard

Make encryption your organization's shield when you add Adeya to your mobile-first strategy.

At least **30** nations are actively developing cyberattack capabilities.

In 2018, **42%** of all public sector data breaches involved cyber espionage.

National security demands isolated and secure communications.

### Today's challenges

#### Increasing Cyber Espionage Incidents Put Your Organization at Risk

When bad actors compromise your network, maintaining continuity lets your organization recover quickly. In such circumstances, secure communications between command and their troops are vital.

#### Get voice command confirmed with written notifications

Assign mission-critical instructions to personnel and keep track of their progress from start to finish with task acceptance and completion notifications.

#### Solve the Continuity Problem with Adeya

Protect your security interests while empowering your personnel with Adeya's end-to-end (E2E) encrypted collaboration and communication suite.

# Adeya Guard's Advantages

Make encryption your organization's shield when you add Adeya to your mobile-first strategy.

## Communication Application Features

- ✓ E2E encrypted 1-to-1 voice calls, video calls, and voice mails.
- ✓ E2E encrypted SMS and 1-to-1 instant messaging and group chat.
- ✓ Message auto-destruction and take-back.
- ✓ Share your geo position or real-time movements safely.

## Collaboration Application Features

- ✓ Secure file storage and file sharing.
- ✓ Task assignment workflow integration options.
- ✓ Multiple user video calls and screen sharing.

## Administration Console Features

- ✓ User remote wipe and revocation.
- ✓ Screenshot protection or detection, depending on the phone's OS.
- ✓ Integrates with PBX and MDM systems.

## Security by Design

- ✓ In transit and at rest military-grade E2E encryption.
- ✓ On-premise deployment on your infrastructure.
- ✓ High availability system with multiple redundancy options.
- ✓ National crypto programs and custom cryptographic sets optional.

# Adeya's Military and Defense Industry Solution Benefits

- ✓ **Prevent successful cyber-espionage attempts**  
Create secure lines of communication and keep your people safe both at home and in the field.
- ✓ **Stop using bulky specialized communications systems**  
Secure devices don't have to be complicated, heavy, or prohibitively expensive. Install Adeya and instantly get secure communications on any Android or iOS device.
- ✓ **Build a More Responsive Workforce**  
When duty calls, secured lines of communication keep personnel up-to-date and on-task whether they're in-country or overseas.
- ✓ **Task workflow integration**  
Assign and track mission-critical tasks from start to finish with task acceptance and completion notifications.
- ✓ **Easy to Administer with Multi-tenancy**  
Assign separate system administrators and community managers and let your organization's communities manage themselves.
- ✓ **Remote wipe**  
Stolen devices put your sensitive information at risk. Protect yourself by triggering a remote wipe.
