

Liberate your workforce with mobile productivity from bigtincan

The industry's leading tool for mobile first content delivery and enablement: The power to securely deliver, edit, annotate, share, collaborate and empower your mobile field with advanced mobile content management.

Bigtincan's secure, intelligent and social mobile content management platform, hub, automatically delivers all the content your mobile field needs to be truly productive. With secure access to content from multiple content stores (including Sharepoint, SF.com, Box, Sharefile, Skydrive, and even file server shares), ability to publish and run HTML5 content, interactive forms, and public feeds, bigtincan hub enables mobile users to be truly productive on the go.

Key Benefits

A single pane of glass to work with all your content from all your sources: Unite all your content in a single view with bigtincan's open architecture, and enable your teams to be empowered to do more all in a single application to deploy, learn and support.

Key Features

When integrated with App Connect, bigtincan hub enables:

- **Highly Secure, Role based content distribution:** Automatically deliver content to the right people at the right time and location using a Cloud or on-premise model.
- **Work with content:** Includes the baked in ability to edit, annotate documents, and interface with complete forms and workflow.
- **Advanced intelligence and reporting (ContentIQ):** ContentIQ enables advanced understanding and reporting on content usage and value – for content consumers and publishers.

Availability

Ease of deployment and integrated security with App Connect

When combined with App Connect, bigtincan hub can be delivered to the mobile device and pre-configured for setup within – without the user needing to understand technical configurations like server IP addresses and directory integration. And with AppConnect, corporate IT can deploy bigtincan hub wrapped to provide the highest possible levels of security both on device, and through per app VPN capabilities provided by Mobile Iron.
