

# Dashworks: A Project System for IT Migration

## Better IT Project Management - Drive Your IT Transformation

Anyone can buy and build new technology. The challenge is how to migrate your existing environment onto the new one. Dashworks is unique software designed to help you manage and control your complex IT migration projects whether it is desktop, user, application, e-mail, server, data centre or mobile device migration. Ditch the spreadsheets and enter a new world of efficient IT project management, delivered in a single, central source of project truth.

## Product Overview

Dashworks for IT migration is a revolution for IT project managers. No longer do they need to spend 50-60% of their time managing spreadsheets of infrastructure and asset readiness for migration - Dashworks does that job for them. Now they can concentrate on managing budgets, reducing business disruption, driving efficient logistics and accelerating project delivery. The Dashworks readiness traffic light system helps you prioritise how to get the project done. Understand what is ready to migrate, what is holding you up, and how you are tracking against plan.

## Features and Benefits

- > **Your IT migration project, your way** - Flexible project creation and task management means total asset migration readiness control for your project managers
- > **Single Source of Truth** - Collect, manipulate and maintain your IT migration project data in one, authoritative version of project truth
- > **Business Agility** - Flexible asset grouping to target departments, teams and manage priorities across business lines effortlessly
- > **Project Readiness Simplified** - Dynamic traffic light readiness analysis for your infrastructure and assets
- > **Reduced project management costs** - Replace manual spreadsheets with a dynamic real-time dashboards to reduce manual efforts
- > **Better project visibility** - Map your current to target plans and keep your project in sync with live asset change seamlessly
- > **Reduced deployment costs** - Automation takes the pain away from common project tasks like sending tonight's migration list to third party deployment tools
- > **Better reporting** - Real-time dashboards, dynamic data extracts and pre-canned reports give you greater reporting flexibility

## IT Migration Project Challenges

Like many enterprises, you have probably already made the decision to migrate your desktops, servers, e-mail, applications or mobile devices to a new platform. Now comes the difficult part - how to do it quickly, accurately and at the lowest cost?

### Why Are IT Migrations So Difficult?

- > Project management time to collate critical information on your IT infrastructure, locations and departments
- > Project management effort associated with building and managing migration readiness status for the in scope assets
- > Business engagement challenges caused by a lack of centralisation and transparency
- > Managing business change impact on scheduling and logistics

### Remove Barriers To IT Migration

Dashworks simplifies all aspects of IT transformation project setup and management. The project system module imports key information about every asset and associated information to build an organisational view of your IT migration project. Every asset is given a dynamic migration readiness status that changes in real-time as dependent tasks complete. Your project managers are up and running immediately, planning, building, readying, scheduling and delivering IT migration.

## Dashworks Can Help You If

- > You believe that managing your IT migration project will be best achieved by replacing manual spreadsheets with a system to help you to drive IT migrations from a single version of truth
- > You want to utilise existing deployment tools to automate IT migration, but driven from a central scheduling system
- > You believe that real-time project management will lower rollout costs
- > You want to better engage your asset owners with automated communications, self-service data validation and scheduling
- > You do not trust people and process alone to achieve the most efficient, least disruption, lowest cost IT migration project
- > The ability to centrally govern, track and report on the project is important to you

### Why Juriba?

**Using data warehousing and project management tools rather than manual spreadsheets, we can improve efficiency in every aspect of your IT migration planning and delivery. Most organisations spend a large portion of their migration budget on project managers and business analysts. Our tools can reduce this overhead significantly, helping you to deliver your IT migration on time, on budget and leave a legacy of dynamic information to use for generations of projects to come.**

### About Juriba

Juriba is a Microsoft **Gold** partner, developing software to help enterprise organisations migrate between technology platforms. Our unique approach to IT transformation management has delivered readiness analysis and scheduling for over 5 million IT assets across the globe. Our pioneering Dashworks software continues to accelerate IT platform migration project work across every industry sector.
