

SETUP STORE

- ◆ Almost 2.000 links to setups for 'most common' software
- ◆ Every day the database is kept up to date with the latest versions and releases
- ◆ When multiple setups are available, we maintain the ones which are most suitable for enterprise deployment which is applicable for Adobe Flash Player, Adobe Reader, Mozilla Firefox and others
- ◆ Create Applications directly out the 'Setup Store', after a setup has been downloaded (CM2012, MDT)
- ◆ Automatically extract the core setup, when that's a best practice for deployment. Support for .zip, .rar and .iso files and selected MSI bootstrappers.
- ◆ Entries include software from vendors like Adobe, Apple, Citrix, Google, Microsoft, Mozilla, Novell, Oracle, RES Software, SAP, VMware and many others
- ◆ Offering download links to the vendor's website directly, when a direct download option is available. Offline import when not
- ◆ Extensive filter and search options available to search the list for setups of a specific manufacturer, to search for releases of 'Today', 'This week' or 'This month', or a combination of Manufacturer, Productname, File Name, Setup Type or Date
- ◆ Ability to submit suggestions for new entries using 'Request Setup'
- ◆ Integrated with vendor specific 'Configuration Wizards' and the 'Generic MSI Configuration Wizard' for MSI setups
- ◆ Integrated with the 'Repackaging Wizard' to directly configure, and then virtualize or repackage downloaded setups using Turbo Studio, Microsoft App-V 5, RayPack, VMware ThinApp or Flexera AdminStudio (Remote) Repackager.
