OS Migrations

PC Replacements

OS Recovery

Eliminate Malware

Migrate in less than 60 min.

Implement new technology at your business' pace without waiting for IT's schedule.

Migrate with no risk

Protect information through transition while ensuring systems are secure, even on an encrypted device.

No downtime

Allow for the users to get more from technology without down-time, including self-deployment processes and remote deployment kits.

Migrate any time

Deploy easily and often as needed to improve the stability of the PC rather waiting for end-of-life.

Provision per PC

User's PCs are automatically provisioned with the correct applications based on their role in the company.

The Perfect Windows Migration

Migrate Thousands per Day

- ◆ **Reliable zero-touch**
- ◆ **Never lose data**
- ◆ **BIOS to UEFI**
- ◆ **Application matching**
- ◆ **Self-deployment kit**
- ◆ **Full-drive snapshot**
- ◆ **Rollback on error**
- ◆ **Remote user migrations**
- ◆ **Keep PC encrypted**
- ◆ **Validate before starting**
- ◆ **User e-mail notification**
- ◆ **Real-time reporting**

Upgrade to Windows 10

Adopt Windows 10 rapidly

Replace Hardware

Transfer data and settings to new PC directly

Remove Malware

Remove malware and protect your data

Fully Recover from BSOD

Recover from any OS failure quickly

Migrate to New Domain

Migrate profiles across domains — no trusts needed

Upgrade Security

BIOS to UEFI, MBR to GPT, update TPM — all without reformatting

Success Stories

Over the years, companies have saved \$Millions using Swimage for all of their OS deployment and migration needs.

Whether it's a complete company migration or a one-off, Swimage is the answer to get the job done quickly and more reliably than any other solution.

The Perfect Windows Migration

The Challenge

- 5,000 PCs to be reimaged
- 210 unique locations in 49 countries worldwide
- 3,000 in-place migrations
- 2,000 PC hardware replacements
- 1,000 remote users
- Join the domain even if off the corporate network
- Migrate all user profiles from one domain to another, without a domain trust
- Perform image backup of the PC to prevent accidental data loss
- Restore users' data regardless of location on the hard drive
- Restore all users' settings
- Package and reinstall all supported applications
- Handle PCs that are encrypted
- Encrypt all PCs once the migration is completed

The Success

- All PCs migrated
- All profiles migrated to the new domain
- Not a single failure, even with the remote migrations
- Not a single data file lost
- Zero network impact
- All PCs secured and encrypted
- All done using Swimage, average migration time, 60 min.

"Adopting Swimage as our automated migration approach allowed information technology specialists at the Federal Deposit Insurance Corp. to replace close to 5,000 desktop computers in three months."

— Cynthia Bell
FDIC

"...we needed help on Monday and by Tuesday we were deploying systems using Swimage and had completed 60 computers in 2 hours with one person."

— Patrick Whalen
IT Infrastructure Manager
Feeding America

"...the process is much simpler than our previous methods, and now involves just a few mouse clicks to deploy our image and select various templates if we need to add any additional software."

— Todd Fogle
Senior Technology Support Specialist
Bucknell University
