

# TigerText Secure Text Messaging

Accelerates Workflow & Achieves Industry Compliance

Built for the enterprise, Tigertext lets you send secure, encrypted text messages and files that permanently disappear from phone servers and devices.

## Share Data & Collaborate Securely

TigerText instantly connects you with co-workers, eliminating the need for outdated and unreliable forms of communication like emails, pagers, or repetitive voice mails.

### Communication Kept Safe

- Messages are encrypted end-to-end
- Administrator controls keep IT in charge
- Messages permanently deleted after a set time

### Transform Workflow Process

- Accelerate employee communications
- Team collaboration for greater productivity
- Reduce miscommunication and errors

### Comply With Industry Regulations

- Satisfy HIPAA and SOX requirements
- Stay compliant in a Bring-Your-Own-Device World
- Backed by TigerText's Million Dollar Compliance Guarantee

### Delivery Confirmation

With Delivery Confirmation, you'll know instantly if messages have been delivered and read, helping you and your team work more efficiently.

### Message Forwarding

Message Forwarding lets users share messages with colleagues, making it easy to bring experts and others into a conversation.

### Delivery Escalation

Connectivity issues inside buildings can hamper communication, but with TigerText's Delivery Escalation, notifications not delivered within 5 minutes are automatically resent via alternate SMS.

### Multiple Inboxes

TigerText's Multiple Inbox capability lets healthcare professionals access secure text messages from their various accounts using one easy menu inside the app.

### Do Not Disturb

Similar to an out-of-office reply for email, 'Do Not Disturb' lets colleagues know you're not available and lets you create custom auto-replies with alternate contacts and instructions.

### Secure Attachments

TigerText's desktop version integrates with cloud storage apps like Box, Google Drive, and Dropbox so you can securely attach PDFs, images, and other files to your TigerText messages.

## About TigerText

TigerText is the leader in secure, real-time messaging for the enterprise, and is committed to keeping mobile communications secure, private and impermanent. More than 5,000 locations have adopted TigerText, and the company processes over 300+ million messages per month on its platform.
