Network requirements

Communication between whoosh ivants Controller/Agents and ivanti Service Manager is handled via an HTTPS-protocol. Thus, HTTPS capabilities and an internet connection are required on the computer. Communication between Controller and Agent can either be established via HTTP or via HTTPS. Thus, HTTP(S) capabilities are required within the local intranet. It is recommended to have a Public-Key-Infrastructure (PKI) with valid certificates to secure the connection between Controller and Agent. The default is HTTP.
